PREFACE

Colours fascinate children. Naturally, all coloured things around them hold their attention-be it a living thing like a butterfly, a bird, or a flower, or a non-living thing like a house, a toy, a car or a rainbow. This series of 10 books-**Vikas Drawing & Colouring**-is aimed at nurturing the innate interest of children in colours and forms by developing in them a liking for drawing and colouring activities.

The books in this series are well-graded to cater to the needs and interests of different age groups ranging from Nursery to Secondary levels. While the introductory book has mostly colouring exercises, the later books concentrate on drawing as well. Of course, common and familiar objects from the child's surroundings are selected to serve as models for the exercises in all the books.

With the advancement in levels, more techniques in both drawing and painting are illustrated and taught. Techniques like colour shading, collage work, mosaic painting, spray painting and mask making are dealt with at different levels. Some of the topics prescribed for the Grade Examinations too have been included in these books. This series, thus, acquaints children with various aspects and modes of art.

Prepared by a versatile artist, who is a very talented art teacher as well, this unique series is intended to arouse the interest of children in art. **These are not merely colouring books, but books of creative art,** which every student would like to have, and must possess. Let our children have colours filling their world.

NEW TECHNIQUES INTRODUCED IN THIS BOOK

Vikas Drawing and Colouring is a series of 10 books in Art Education with a very fresh look. Prepared for students from KG to Secondary levels, these books are designed with a vision of the interests as well as needs of children at various stages.

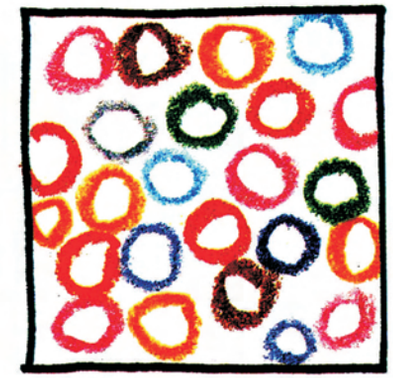
Book A, the introductory book in the series, provides graded colouring exercises for Nursery/KG kids. What's more, this book teaches the children to make certain basic decorative patterns using coloured dots and rings of varying sizes. These patterns add variety to pictures and make them more beautiful.

Making dots and rings would help improve the motor functions of the hands of children and give more control to their fingers. These exercises may also improve their handwriting. Art teachers may encourage the children to practise more of such exercises in rough drawing books.

Small Dots

Big Dots

Mixed Dots



Rings
